

AEDESX SMART GRAVITRAP

LIGHT UP YOUR WORLD

Introducing AedesX Smart Gravitrapp, the world's first patented gravitrapp that eliminates mosquito larvae using negative phototaxis without requiring pesticide. Use it as part of your mosquito management programmes.

Effective

Using automation, every Operation Cycle guarantees 100% mortality in mosquito larvae trapped inside Kill Zone

Scientific

Negative phototaxis has been studied by researchers for many years in animals, including mosquito larvae

Portable & flexible

No plugs, no sockets, no cables or wires needed – Just deploy AedesX Smart Gravitrapps at wherever strategic to your mosquito management programme

Low-maintenance

All you need are batteries and water, and AedesX Smart Gravitrapp takes care of the rest automatically

Pesticide-free

Mosquito larvae are trapped in Kill Zone using negative phototaxis and eliminated subsequently through asphyxiation, without requiring pesticides
